

ON-LINE WEBINARS

Economical training using the latest web-based communications technology

On-the-job technical training at the click of a mouse – receive instruction from experienced senior instructor who will explain, clarify and demonstrate procedures using the latest internet meeting technology

- Multimedia information is easily viewed on your PC
- Take advantage of integrated voice conferencing
- Record meetings for those who missed the session

Count on easy, secure, cost-effective web meeting technology and save time, money, and hassles with KSEC Webinars. You can simultaneously train large groups with participants at locations worldwide.

Visual content is shared over the web in real time as your phone conference—so everyone sees and hears the same thing at the same time. You'll reach more learners in less time—and you'll save the travel and costs associated with traditional on-site training.

Webinar Custom Development

Webinars are custom designed to meet the particular needs of each group.

- **Phone interviews are used to assess current needs and expectations**
- **Subject matter and learning objectives driven by your requirements**

Who Should Use Webinars

- **Those who want to share common knowledge and understanding with a large group**
- **Those who want highly customized training materials**
- **Situations where trainees are at multiple locations**

Learning Environment

Webinars are delivered on-the-job, at your site virtually via the internet . A KSEC training expert will work with your personnel in an interactive environment that allows ample opportunities for questions and answers.

Webinars are Safe and Secure

Easily share any document you want with complete desktop privacy—unless you choose to share it.

Rely on encryption of every session to ensure that even your most sensitive meetings will remain private.
